

Editorial

Welcome to the inaugural issue of EMBnet.journal: bioinformatics in action. This first issue marks the complete transition from EMBnet.News, an online magazine produced by the EMBnet community since 1994, to EMBnet.journal an international, Open Access, peer-reviewed journal, available from December 2010 at <http://journal.embnet.org>.

EMBnet.journal will provide biomedical scientists with practical information to help tackle routine data-analysis tasks (basic and advanced), implement complex, multi-faceted IT architectural infrastructures and address the many new challenges of modern, data-driven life sciences research.

This new online journal will comprise two main parts: one part will focus on peer-reviewed primary research articles, reviews and technical notes and the other part will contain useful information and resources including commentaries, user-guides, training information and news.

We are now accepting manuscripts for review and publication and look forward to receiving your contributions and feedback. Submit your articles at: <http://journal.embnet.org/index.php/embnetjournal/information/authors>

Protein Spotlight (ISSN 1424-4721) is a periodical electronic review from the SWISS-PROT group of the Swiss Institute of Bioinformatics (SIB). It is published on a monthly basis and consists of articles focused on particular proteins of interest. Each issue is available, free of charge, in HTML or PDF format at <http://www.expasy.org/spotlight>.

We provide the EMBnet community with a printed version of issue 123. Please let us know if you like this inclusion.
